

Clinical placements

Guide for students

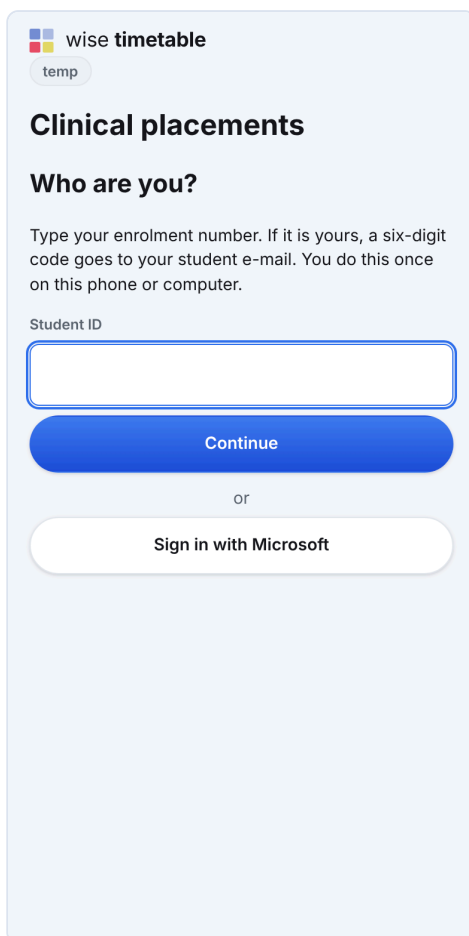

October 2026

Contents: Signing in - once per phone · What the page shows

Your school plans your clinical placements in the timetable. On your own page you see where you are this week, the address, your mentors, your hours so far and your whole rotation for the year. Your school gives you the address; it ends in /a/placements.

Signing in - once per phone

1. Type your enrolment number and press **Continue**.
2. A six-digit code arrives by e-mail (to the address on your record, or your student address). Type it in. Where the school uses Microsoft, you can sign in with your school account instead.
3. That is all: the phone stays signed in - for attendance, electives, placements and exams alike. On a phone that is not yours, use **Not you? Make this phone forget** at the bottom.

The screenshot shows a mobile app interface for 'wise timetable'. At the top, there's a header with the logo and a 'temp' status. Below this, the title 'Clinical placements' is displayed. The section 'Who are you?' asks the user to type their enrolment number, with a note that a six-digit code will be sent to their student e-mail. A text input field for 'Student ID' is provided, followed by a blue 'Continue' button. Below the button, the word 'or' is centered, and a white button with a blue border labeled 'Sign in with Microsoft' is shown.

Signing in with the enrolment number.

What the page shows

- **This week** - the site, the department, the speciality; between blocks, where you go next and from when.

- The address with a link to a **map**, the days and times, and your **Mentors** (with e-mail where there is one).
- Your hours so far against the hours you owe - counted from the timetable.
- **Your rotation** - every block in order, marked done, now or coming.

This week, the address, the mentors and the hours.

Something wrong?

The page shows only what the timetable holds for you. If it says nothing, or your group is wrong, ask the student office: you must be in your group in the timetable.
